

MARVECRACTIONS CUSTOMIZED ART

As an artist specializing in graphic design, images on clay and other media, I am excited about producing aesthetically beautiful, well crafted art which is architecturally enhancing and informative.

Visuals immediately set a tone and impact the viewer. Beyond the esthetics of beauty, art is the media which has the ability to instantly inform, insight and sway the emotions of the viewer who then becomes an interactive participant.

Visual art can be educational and provide information which is not available thru a public proprietor. It is an attention to details which sets a tone of discerning sensitivity and quality. Many customized images may be negotiated and transferred to commemorative objects for retail sales and promotion.

My customized art images have a limitless range for depiction from science, to sports, to law, botanical, medical, to art deco or any design with or without subject matter. Designs may be created in a variety of media, including hand painted ceramic tile, etched surfaces, wood, metal and carved or stained glass.

I offer sandblasted hieroglyphic type imagery, relief base freeze work for interior, exterior application from 2 inches to 68 feet in full color spectrum to single color tones.

I have completed numerous public art projects using hand painted ceramic tile as a community involvement catalyst, promoting collaboration, the importance of loving relationships, environmental responsibility and the peaceful appreciation of ethnic diversity.

I am available to discuss your personal or organizational site needs and artistic possibilities for rendering, community involvement if applicable, fund raising events and other news worthy publicity options.

If desired, I am available for collaborative design work and execution with a construction company and architectural firm of your choice.

Thank you for the time and consideration you have shown me.
